

# 32 DLCS

**Product No. 1102**

**Form: Pellet**

A very palatable, high bypass, pelleted supplement with cottonseed formulated to be top dressed or mixed with your grain for high producing herds or high producing cows in early lactation.

## FEATURES AND BENEFITS

- Added fat from cottonseed and animal fat provide additional energy for cows in early lactation, reducing weight loss and improving milk production
- Quality protein sources that are less rumen degradable, resulting in improved milk production potential
- Nutrient balanced to improve nutrient digestion and utilization, resulting in greater milk production
- Pelleted for greater cow acceptability

## DIRECTIONS FOR USE

Can be top dressed, mixed into a grain mix or mixed directly into a TMR. The protein level of the grain mix depends on the quality and type of forage(s) being fed, as well as the level of milk production. Forage quality must be analyzed to determine accurate ration balancing and feeding recommendations. Provide plenty of fresh, clean water at all times.

## GUARANTEED ANALYSIS

Crude Protein	(Min)	32.0 %	Phosphorus (P)	(Min)	1.0 %
Crude Fat	(Min)	9.0 %	Selenium (Se)	(Min)	2.4 ppm
Crude Fiber	(Max)	8.0 %	Vitamin A	(Min)	35,000 IU/lb
Acid Detergent Fiber	(Max)	13.0 %	Vitamin D3	(Min)	6,000 IU/lb
Calcium (Ca)	(Min)	1.3 %	Vitamin E	(Min)	40 IU/lb
Calcium (Ca)	(Max)	1.8 %
