

ENTICER ROBOT PELLETT

Product No. 1150

Form: Pellet

A durable, highly palatable pellet designed to entice cows to frequent the robotic milking system.

FEATURES AND BENEFITS

- Durable pellet with minimal fines, perfect for use in a robotic system.
- High starch pellet with added protein to provide cows a well-balanced diet in addition to their partially mixed ration.
- Contains caramel flavoring to increase palatability and further encourage cows to visit the robot.

DIRECTIONS FOR USE

Provide Enticer Robot Pellet to lactating dairy cattle through robotic milking systems. Feed at a rate of 4 – 18 lb/head/day depending on milk production as part of a complete ration or per the recommendation of your Famo Feeds Representative. Provide plenty of fresh, clean water at all times.
