

GFC SWINE FEEDER 1.0 VTM

Product No. 126BAG

Form: Vitamin

A 2 lb/ton inclusion rate, phytase containing vitamin trace mineral premix formulated to be mixed with other feedstuffs to make appropriate nutrient density growing and finishing swine rations.

FEATURES AND BENEFITS

- Ration flexibility allows components to be added at different levels to fine tune each production stage
- Contains phytase for improved phosphorus and trace mineral digestibility
- Complete vitamin and trace mineral premix. Premixing improves dispersion of trace ingredients in the final ration

DIRECTIONS FOR USE

Use at the rate not to exceed 2.0 lbs/ton to provide 0.3 ppm of added selenium in the finished feed.

CAUTION: Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted. Store in a dry, well-ventilated area free from rodents and insects. Do not use moldy or insect-infested feed.

*One unit of phytase activity (FTU) is defined as the quantity of enzyme which liberates 1 micro-mole of inorganic phosphorus/minute.
