

# SELECT RECEIVER/STARTER PELLETS B250

Product No. 1422

Form: Pellet

A 26% crude protein pelleted supplement formulated to be fed at 2 lb/head/day. This supplement should be fed to new arrival feedlot calves for a period of 14 to 28 days. Young and highly stressed calves should be put on a 28 day program. Yearling and lighter stress calves can be put on a shorter program. Select Receiver/Starter 2# contains additives supporting feed intake, average daily gain and feed efficiency of incoming calves.

### MEDICATED

Lasalocid (as lasalocid sodium) 250 g/ton. Equivalent to 125 mg lasalocid/lb.

### FEATURES AND BENEFITS

- Chromium Propionate: Texas Tech University reported improved dry matter intake, average daily gain and feed efficiency from steers supplemented with chromium
- Bovatec: A trusted feed additive that will not compromise feed intake in starting cattle. Approved for improved feed efficiency, increased weight gain, and control of coccidiosis.
- Diamond V® XP™ Yeast: Studies report improved intake in disease challenged steers when fed Diamond V®XP™ Yeast
- ZinPro Availa-4: Colorado State University reported increased gains and decreased morbidity during the receiving period

### DIRECTIONS FOR USE

Feed 2 lb pellets/day to provide 250 mg lasalocid/head/day. This product contains 125 mg lasalocid/lb. Provide plenty of fresh, clean water at all times.
