

SAV-A-CAF®

ULTRA 24

Product No. 1937

Form: Case

A multi-species milk replacer to be fed to herd replacement calves, foals, baby pigs, puppies, lambs, goat kids, llama and alpaca crias, fawns and elk calves. May also be used as a dry powder supplement. May be used in liquid or dry powder form for intermittent or supplemental feeding in kittens.

FEATURES AND BENEFITS

- Complete and balanced nutrition for 10 different species of farm animals and pets
- All-milk protein sources that supports optimal digestibility and helps animals grow to their genetic potential
- Fortified with 26 essential vitamins and minerals that meet all nutritional needs
- Exclusive Magic Crystals® technology that produces milk replacer that mixes easily and stays in solution

INDICATIONS FOR USE

Using a standard kitchen cup (cup included in 4lb & 8lb bags), mix the required amounts of powder into warm (115 – 120° F) water. Add powder to water and mix thoroughly. Allow the mixed milk replacer solution to cool to 95 – 100° F before feeding. The enclosed cup (in the 4lb & 8lb bags) holds approximately 3.5 ounces (113 grams) dry powder by weight, approximately equal in volume to a standard dry kitchen cup. NOTE: Due to the difference in density, 3.5 ounces of powder fits in the same size cup as 8 fluid ounces of water. See feed tag for feeding directions for each species.
