

# SAV-A-CHICK® ELECTROLYTE

Product No. 1944

Form: Case

Poultry electrolyte and vitamin supplement for use in drinking water during periods of hot weather or other stress. May be used alone or with Sav-A-Chick® Probiotic.

## FEATURES AND BENEFITS

- Formulated specifically for poultry: chickens, ducks, turkeys and other domestic poultry and waterfowl.
- Supports hydration and bird health during periods of hot weather or other stress
- Suitable for chicks and adult birds
- Retail unit is a 3-strip of 0.25 oz packets, packed 20 –strips in a pop-up display carton (3 display cartons per master carton) which is designed specifically for small backyard flocks
- Each pre-measured packet mixes into one gallon of drinking water for convenience

## DIRECTIONS FOR USE

Mix a single packet (approx. 0.25 ounces of powder) into 1 gallon of clean, cool water. If using with Sav-A-Chick® Probiotic, mix one packet of each product into the same gallon of water. Offer the mixed solution AND plain drinking water (in a separate container) at all times during hot weather or other stress.

*Important: Make fresh solution daily.*
