

RUMENSIN 1200

Product No. 2509

Form: Short Pellet

A highly concentrated form of monensin (Rumensin®) that can be mixed into a grain mix without adding additional proteins or minerals. For prevention and control of coccidiosis in beef cattle, calves, and goats.

MEDICATED

Monensin, USP 1,200 g/ton. Equivalent to 600 mg monensin/lb.

FEATURES AND BENEFITS

- 1,200 grams monensin (Rumensin®) per ton (600 mg per pound) which is concentrated enough to use at a low rate and still ensure proper mixing
- No additional protein or minerals so it will not interfere with your present feeding program
- Short pellet which is convenient and easy to feed. Mixes well. Won't blow away

DIRECTIONS FOR USE

The indicated amount of Rumensin 1200 can be top dressed on individual rations or completely mixed into the regular ration or TMR for each animal. See tag for specific dosing guidelines. Please consult with your Famo Feeds dealer or representative for information concerning specific rations or mixes. Provide plenty of fresh, clean water at all times.
