

# RUMENSIN 4000 FOR CATTLE

Product No. 2511 Form: Pellet

A supplement designed to incorporate monensin (Rumensin®) into dairy and beef rations.

FOR USE IN DAIRY AND BEEF CATTLE FEED ONLY. DO NOT FEED UNDILUTED.

### **MEDICATED**

Monensin, USP 4,000 g/ton. Equivalent to 2,000 mg monensin/lb.

### **FEATURES AND BENEFITS**

• Mixes well in rations; less separation

## Dairy:

- Monensin (Rumensin®) increases milk production efficiency
- Supplement form gives flexibility to incorporate different amounts of monensin (Rumensin®) into specific cow group rations

### Beef

Monensin (Rumensin®) increases feed efficiency.

### **DIRECTIONS FOR USE**

## For increased milk production efficiency in dairy cattle

Thoroughly mix monensin Type B Medicated Feed into 1 ton of component portion of the ration to obtain the correct concentration of the Type C Medicated Feed (11 - 400 g/ton monensin).

	Desired monensin concentration g/ton			
	50	200	400	
Lb of R4000 per ton of component feed	25	100	200	

### For improved feed efficiency in cattle fed in confinement for slaughter

Thoroughly mix monensin Type B Medicated Feed into the appropriate amount of non-medicated feed to obtain the correct concentration in the Type C Medicated Feed, 5-40 g/ton monensin for feed efficiency.

Desired monensin level in feed (g/ton)	Amount of R4000 per ton of feed (lb/ton)	Amount of non-medicated feed (lb/ton)
20	10	1,990
30	15	1,985
