

BEEF BUILDER COPRO CALVING & BREEDING PERFORMANCE MINERAL

Product No. 2574

Form: Mineral

Beef Builder Copro Calving & Breeding Performance Mineral is formulated for brood cows consuming diets high in corn coproducts such as corn distillers grains, corn syrup and corn gluten feed. This mineral is specifically formulated to be fed during the critical calving and breeding period from 60 days before calving until the cows are bred back. The mineral should be fed year round in situations where trace mineral antagonists are present. Examples of trace mineral antagonists are sulfate from high sulfate water and molybdenum from high molybdenum forages.

FEATURES AND BENEFITS

- High calcium and no added phosphorus formulation to balance the low calcium and high phosphorus in corn coproducts.
- Organic trace minerals to support optimal animal performance, especially in diets with high sulfur and/or molybdenum content
- Added thiamine as is indicated when feeding corn coproducts with high sulfur content.

DIRECTIONS FOR USE

Intake of mineral should be targeted at approximately 4 oz/head/day to adult animals. Young stock should consume 2 – 4 oz/head/day depending upon size. If mineral is offered free choice, it should be introduced over a 14 day period. Offer mineral daily during this period to prevent overconsumption. Mineral may also be mixed with grain and roughage and fed as part of a grain mix or total mixed ration.

GUARANTEED ANALYSIS

Calcium (Ca)	(Min)	21.1 %	Manganese (Mn)	(Min)	8,000 ppm
Calcium (Ca)	(Max)	25.3 %	Selenium (Se)	(Min)	26 ppm
Salt (NaCl)	(Min)	12.5 %	Zinc (Zn)	(Min)	8,000 ppm
Salt (NaCl)	(Max)	15.0 %	Vitamin A	(Min)	300,000 IU/lb
Magnesium (Mg)	(Min)	1.0 %	Vitamin D	(Min)	30,000 IU/lb
Cobalt (Co)	(Min)	55 ppm	Vitamin E	(Min)	800 IU/lb
Copper (Cu)	(Min)	2,000ppm	Thiamine	(Min)	400 mg/lb
Iodine (I)	(Min)	150 ppm
