

# SAFE-GUARD® CATTLE DEWORMER

**Product No. 2811**

**Form: Short Pellet**

A palatable dewormer, in pellet form, that may be top dressed, mixed into a grain ration or mixed into a TMR.

## MEDICATED

Fenbendazole 4,540 g/ton (0.50 %). Equivalent to 2,270 mg fenbendazole/lb.

## FEATURES AND BENEFITS

- Contains fenbendazole for the broadest coverage available for internal parasites
- Extremely safe so over-consumption has no negative effect
- Can be fed to cattle, swine and certain zoo and wildlife animals. See your Famo Feeds dealer or representative for details
- Pelleted which makes it convenient and easy to feed; mixes well and won't blow away

## DIRECTIONS FOR USE

Feed at the rate of 0.1 lb/100 lb of body weight either mixed into a complete feed or as a top dress. This product is to be fed as a 1 day treatment.

As an alternative to weighing out the pellets, a standard measuring cup (8 oz fluid) may be used as follows:

1 full scoop/400 lb body weight

2/3 line/200 lb body weight

1/3 line/100 lb body weight

**WITHDRAWAL PERIODS AND RESIDUE WARNINGS:** Milk taken during treatment and for 60 hours after the last treatment must not be used for human consumption. Cattle must not be slaughtered for human consumption within 13 days following last treatment with this drug product. Not for use in beef calves less than 2 months of age, dairy calves, and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves.
